Executive Summary

The One Program is the central pillar in piloting UN Reform in Pakistan, with "Delivering as One" being the motto and ultimate objective of the Pilot. The pilot experiment is a reflection of the Government of Pakistan's effort at the highest level towards reforming for improved coherent development delivery. The "One Program" is the framework that encompasses major strategies, initiatives, approaches, and tools through which 60-80% of the UN's resources in Pakistan will be channeled through the period of 2008-2010 with the possibility of going beyond 2010.

The five Joint Programs and their approximately 20 components are an outcome of the reviewed UNDAF (United Nations Development Assistance Framework). As a first step in the formulation process, the federal and provincial partners in the Government of Pakistan undertook a thorough review of the UNDAF¹ in full collaboration with the UN agencies, funds and programs operational in the country as well as some of the non-resident agencies. The UNDAF review processes involved several stages including situation analysis; stakeholder and SWOT (Strengths, Weaknesses, Opportunities and Threats) analyses; strategic prioritization and review of major outcomes and outputs; and the setting of measurable and meaningful indicators to monitor progress. Extended until 2010 to align with the national developmental planning cycle, the current UNDAF (2004-2008) provides the basis for the One Program. Aside from the review of the UNDAF, the whole process of formulation of the five Joint Programs (JPs) and their constituent Joint Program Components (JPCs) have been conducted in a highly participatory manner that involved key stakeholders; including relevant governmental authorities at the federal and provincial levels, as well as the donors and civil society organizations.

Stemming from, and responding to established national priorities, the One Program identifies five Joint Programs, reflecting the major areas of UN support to the developmental processes in Pakistan. These Joint Programs include: **agriculture rural development and poverty reduction; education; health and population; environment; and disaster risk management**. Four cross cutting issues are addressed in all of the five Joint Programs: **civil society engagement, human rights, gender equality and refugees**. These represent the anchors of the One Program and the detailed formulation of all Joint Programs and their Components has been in accordance with those.

While the extended UNDAF will continue to be implemented through the individual and collaborative programs of the UN participating organizations, the JPs of the One Program itself will be implemented from 2009 by 16 UN development agencies resident and operational in the country in close collaboration with their national counterparts, and benefiting from the financial support of the donor partners.

The One Program outlines an inclusive governance structure at different tiers of oversight, guidance and decision making including at the overall Program Level, Joint Program and Joint Program Component levels. All foras engage the Government and participating agencies in the review, assessment, monitoring and the evaluation processes.

In conclusion, the One Program is a major step by the UN to deliver as one, offering the potential for far greater impact on Pakistan's development and humanitarian challenges, avoiding fragmentation and duplication of efforts, while banking on the synergies and broad range of competencies available through the UN system. The vision of the One UN in Pakistan is about being an effective partner, focusing on the UN's comparative advantages, being strategic about development priorities, using available resource judiciously and reinforcing the leadership of Pakistani actors in a way that ensures the strengthening of national capacities sustainably.

¹ The current UNDAF was prepared and signed by the UN system and Government of Pakistan at the end of 2003. It covered the period 2004-2008.

Context for the UN Reform in Pakistan

The High Level Panel co-chaired by Pakistan's former Prime Minister approved the UN Reform framework that provides the highest level endorsement for the One Program. In late 2006, the Government requested its continuing collaboration with UN in the country to be on the basis of the "delivering as one" principles espoused in the report of the High Level Panel. Consequently, the UN Reform in Pakistan was formally launched by the Prime Minister on March 1, 2007.

Based on the Common Country Assessment, and covering the period 2004-2008, Pakistan's earlier UN Development Assistance Framework (UNDAF) was agreed and signed by the Government of Pakistan in late 2003. In 2007, as an integral part of piloting UN Reform in Pakistan, it was decided to: (a) extend the UNDAF by two years to the end of 2010, facilitating the alignment with the National Medium Term Development Framework; and (b) to review it towards better focus and response to the rapidly evolving development needs of the country. Upon its signature, the One Program will become UN's primary channel of delivery of its socio economic support to Pakistan's development, while the existing UN programs and projects will run there previously agreed course to completion.

Responding to the principles in the extended UNDAF and to the Government's new priorities, the UN Country Team works closely with their federal and provincial partners, the civil society organizations, the private sector, academia and donors to develop the One Program in Pakistan that rests on five thematic pillars. In collaboration with our counterparts, individual agency country program action plans were reviewed, development situation analyzed through inclusive multi stakeholder reviews, SWOTs carried out, lessons learnt logged, national development results achieved through 2007 examined and strategic reprioritization undertaken by both the participating UN agencies and government partners, resulting in development of the One Program that focuses and directs the UNDAF for the extended period 2009-2010.

In the new aid environment, the UN has structured its collective contribution around those comparative advantages for which it is recognized. Drawing from the findings and recommendations of the detailed situational analyses for the joint programs, the UN has aligned its support to national priorities, and a real process of national ownership between government and civil society focused on the organizations comparative advantage with respect to other actors, provided support to unmet needs and built on past lessons and ongoing efforts.

"Delivering as One" is the central pillar for piloting UN Reform in Pakistan through maximizing its normative and analytical expertise, its operational and coordination capabilities and its advocacy role in a coherent, effective and efficient manner. The UN entities will come together as One Leader, One Program, One Office and One Budget, with the One Program being the central pillar of the Reform. The other three "Ones" will support the formulation and implementation of the One Program.

The One Program will rest on the global standards established at the various platforms of the UN and to which Pakistan has acceded – especially, the broad coverage provided under the Universal Declaration of Human Rights and the Millennium Declaration. Making the best use of the UN's mandate, neutral political position and convener of stakeholders, the aim of the One Program is to deliver **advocacy** messages through partnerships with civil society organization and other partners during its implementation. The rights-based approaches to development programming will facilitate the One Program to reach out to those areas and groups who do not readily benefit fully from growth as well as support Government's strengthening of democratic structures and systems of good governance.

The more cohesive One Program and UN Country Team will be a more effective participant in ***policy research, policy advisory, program preparation, project implementation*** and a more powerful advocate of UN policies and values in line with the national priorities of Government of Pakistan. Increased consistency and coherence of policy advocacy and advisory will enable the UN to speak with one voice and to create space for individual agencies to take a more proactive approach to agency-specific policy areas in line with the main objectives of the One UN.

The UN's ***convening role*** in socio-economic areas will be enhanced through a better harmonized UN system in Pakistan. Through the One Program, the UN will leverage its aid coordination role – particularly, to strengthen the national capacity for a nationally-driven aid effectiveness agenda. In addition the UN will facilitate dialogue across government and non government organizations.

Helping the Government to ***strengthen its capacity and service delivery*** to implement the PRSP II as well as relevant human rights frameworks such as CRC and CEDAW. All sector and provincial plans of the PRSP II is a shared objective of all UN agencies in Pakistan. The One Program will identify synergies and opportunities to work better together with focused efforts. This will be important as the UN increasingly delivers its support at the provinces and districts in program preparation and project implementation on a sustainable basis.

One of the well-recognized roles of the UN agencies globally and in Pakistan is the provision of ***technical expertise*** in support of national development priorities. As a constellation of global standard-setting agencies, and with experience garnered throughout the globe, the UN system is uniquely placed to respond to Pakistan's technical assistance needs and strengthen its key institutions. The UN system's value in provision of technical assistance lies not only in its multi-disciplinary experience and ability to draw on a repository of global knowledge and expertise but also on the varied mandates and competencies of the many UN agencies for program preparation and project implementation.

The One Program aims to eventually capture between 60-80% of UN support provided to Pakistan throughout the period 2008-2010. Built to address the key development challenges of Pakistan, the five Joint Programs with their multitude of components constitute the One Program.

In the formulation of the One Program, the UN Country Team has ensured the inclusion of a number of key lessons which had emerged from earlier UN efforts. These will also be major drivers for the implementation of the One Program:

1. ***Success of the UN interventions and technical assistance depends upon as much on the quality of the relationship and the process by which it happens as on the quality of inputs themselves as well as alignment with government development priorities.*** The participating UN Agencies at all times and at all levels will focus on building strong and mutually-respectful partnerships.
2. ***Duplication is to be avoided and quality of activities enhanced by improving coordination*** between implementing partners and other stakeholders through effective partnerships among Government, participating UN organizations, donor community, civil society organizations and the private sector.
3. ***UN assistance will be used to strengthen national capacities in formulation and implementation of nationally-owned reform policies, programs and projects*** funded by Government and others, particularly in those areas where participating UN agencies have demonstrated a comparative advantage. In particular, attention needs to be paid to strengthen policy oversight in planning, budgeting, monitoring and coordination as well as gender mainstreaming of policy tools.
4. ***Stronger strategic focus on governance reform, coupled with a shift towards policy advice*** will enhance the sustainability and impact of UN assistance. Support to good governance measures at all three tiers (Federal, Provincial and District levels) will be important. Further extension and deepening of economic reform requires continued progress in political, administrative and legal reforms. Greater public participation, increasing respect

- for the rule of law and enhanced accountability and transparency are needed to protect citizens, in particular those who are most vulnerable.
5. ***Strengthen access to and improve the quality of social and protection services*** to bridge the sizeable gaps in the provision of health, population and nutrition, education, water and sanitation, community development and the growing disparities between the rich and the poor, men and women as well as boys and girls.
 6. ***Harmonization of resource mobilization around the One Program will promote coherence of national, UN and donor efforts.*** Limited funds should be deployed catalytically and supplemented with other resources mobilized for Joint Programs with pass-through arrangements to promote harmonization among development partners.
 7. ***Enhanced coordination is required to strengthen data quality, data analysis as well as their effective use*** in policy, legislative development, monitoring and evaluation. A results based approach will be adopted to strengthen accountability and transparency in all projects. Poverty mapping will be used for improved targeting of development resources to vulnerable groups - especially, as their vulnerabilities become more acute due to increased food prices and economic crisis currently affecting Pakistan.

To jump start the process of piloting UN Reform in Pakistan, a Transformation Fund was conceptualized and with kind contributions from Australia, Canada, Norway, the Netherlands, and Switzerland, a total of \$3.5 million was collected. The allocation and use of these funds is overseen by the UN Country Team and managed by a Transformation Fund Management Committee. The main purpose of the Fund is to facilitate transformative changes of the UN in Pakistan with a view to effectively "delivering as one".

Pakistan's Development Context

Despite a robust economic growth of 7% over the last 5 years, Pakistan's economic and social indicators reflect fragility and remain vulnerable to domestic and external pressures. With a Human Development Index of 0.551, Pakistan ranks 136th out of 177. There have been some modest distributional gains from growth resulting in a reduction of poverty which, nevertheless, stands close to 25%. Pakistan's Gender Development Index stands at 95.3% demonstrating unequal human development gains between men and women.

Pakistan's economy is currently facing four major challenges – deceleration in growth, rising inflation (particularly in food prices), a growing fiscal deficit and the widening of trade and current account deficits.

In the last two years Pakistan has witnessed political changes; an unstable law and order situation; supply shocks; soaring prices of oil, food and other commodities; energy shortages; softening of external demand and with the turmoil in international financial markets, all adversely affecting Pakistan's key macro-economic fundamentals.

Several macroeconomic indicators understandably missed their target. The GDP growth posted a growth of 5.8% against a target of 7.2%. Agriculture grew at 1.5% against the target of 4.8%. Large scale manufacturing grew at 4.8% against a target of 12.5%. Inflation, particularly food inflation at 17.2% and 25.5% respectively were the highest increases in over three decades. Fiscal deficit stood at 6.5% against a target of 4%. Revenue deficit is projected at 2.7% of GDP against a target of 0% - an infringement of the Fiscal Responsibility and Debt Limitation Act.

Slow GDP growth has resulted in lower tax collection. Continued subsidies on food and oil to domestic consumers, a subsidized power tariff added to the increase in fiscal deficit and current

account. This coincided with sharp decline in external financing flows forcing the reliance on the State Bank for budgetary financing. Excessive monetary expansion has also fuelled inflation.

Unprecedented rise in the oil and food prices and a significant increase in interest payments contributed to a widening current account shortfall that has led to a growing balance of payments deficit and a sharp decline in foreign exchange reserves. Pakistan's currency after remaining stable for around 4 years has weakened significantly against the US dollar, accompanied by a drop in the reserves, and eroding the already precarious purchasing power of the poor. The deceleration in growth and investment coupled with rising inflation, particularly food inflation and eroding value of the rupee, is negatively impacting the living standards of the low- and fixed-income groups, especially the poor.

The Planning Commission, based on the 2005-2006 data, has estimated an inflation-adjusted poverty line of PKR944 per adult equivalent per month with a headcount ratio of 22%, representing a rather small decline of 1.6% from the previous year. The incidence, manifestation, and causes of poverty and vulnerability vary across Pakistan. The poverty profile is determined by using demographic variables—such as the size of household, its geographical location, the gender and literacy level of the household head, the gender of the household head and access to electricity, community services (e.g., education, health, and transport). Affected by the said variables, poverty predominantly remains a rural phenomenon, where 75% of Pakistan's vulnerable households reside. Moreover, there are significant inter-provincial disparities of poverty prevalence.

Pakistan Poverty Assessments indicate the primary causes of poverty are lack of access to jobs, land, assets, savings, insurance products, institutional credit, and assistance options. Patterns of multi-generational poverty traps are common: poverty incurred by one generation is transferred across to subsequent ones, with no apparent hope of escape.

Another characteristic of poverty in Pakistan, revealed by the Assessments, is the large number of households just above the poverty line. Hence, small changes in consumption/income have large effects on the poverty headcount ratios. Thus, one can speculate with a degree of certainty that the socio-economic turmoil of the last two years must have adversely affected the national poverty reduction efforts.

During the next four decades, two factors are likely to shape the Pakistan economy. The first relates to the demographic make-up of the country the customary situation with high birth rates and high death rates changes to one of low birth and death rates. The second influence will be how effectively Pakistan makes use of globalization, with a fuller integration to the world politically, economically and socially.

Pakistan's population of 159 million is growing at 1.9% per annum, with 70% of the citizens below the age of 30. It is estimated that, at its current growth rate, the population of Pakistan will double by 2050. Population and development are intrinsically linked. A rapidly growing population requires commensurate resources for literacy, primary schooling, health, housing and food production in order to ensure that the upcoming generations are a force for uplifting the country rather than becoming a drag on its path to more harmony and prosperity.

Pakistan is steadily improving its human capital, but the country faces many challenges before it can attain the objective of universal literacy and primary education. The overall literacy rate of 54% fell short of the PRSP target of 59.5% for 2005-06. In urban areas, more than two-thirds of the adult population is literate. In rural areas, the proportion of the literate adult population is low though increasing, but the gap between urban and rural areas is closing only very slowly. Female literacy continues to be much lower than male literacy in both rural and urban areas.

Since the 1990s, the primary-level net enrolment rate has increased significantly, reaching 52%. However, progress is still slow and inadequate to achieve the goals of Education For All and the

Millennium Development Goals. Depressed school attendance rates eventually increase the poverty rate.

The National Education Policy emphasizes increase in gross and net enrollment rates, reduction in dropout rates, removing urban-rural and gender imbalances, improving the quality of education at all levels (including higher education), and encouraging private sector participation. To achieve those outcomes, focus is on functional schools in the public sector, teachers' training, and providing basic facilities in schools especially drinking water, electricity, toilets, and boundary walls. Further incentives for parents to keep their children, especially girls, in school include: more scholarships, free textbooks, a supply of cooking oil to their families, and in some cases, cash awards and free uniforms.

The education strategy on Technical and Vocational Education and Training has remained fragmented and supply-driven. Presently, there are significant outlays out of the public sector budget which is planned to be doubled by 2010. A revised strategy envisages enhanced focus on market demand, building competencies, forging public private partnerships, as well as investments in infrastructure and teacher quality.

Illiteracy, lack of access to clean drinking water and sanitation retard the gains made in health. The situation is compounded by a host of institutional issues including inadequate capacities, low budgetary outlays (4% of GDP) and inadequate delivery mechanisms. Pakistan's maternal mortality rate of 450 per 100,000 live births is the highest in the region though the situation is beginning to improve. Major health indicators such as child immunization rate and maternal mortality show a favorable trend, albeit a slow one, with reduced reliance on government facilities for accessing health services.

On HIV and AIDS, Pakistan is placed in a concentrated epidemic category with high risk. Thus in the medium term, the health strategy focuses on raising public sector health expenditures with an emphasis on prevention and control of diseases, reproductive health, child health, and nutrient deficiencies. This repositions the emphasis of public expenditures towards the primary and secondary tiers, a redefined role of federal, provincial and district governments in services delivery and a shift from curative to preventive health care promoting gender equity through targeted interventions, such as increasing the numbers of Community Based Health Workers, Lady Health Workers, expanded immunization initiative, introduction of Hepatitis B vaccine and making substantial improvements in maternal health care.

The full child immunization (including polio) rate remains modest at around 49%; nevertheless, representing a major improvement from the 27% recorded in 2001/02. Indicators on maternal mortality show improvement. Pre natal consultations in urban areas rose to 74% with rural areas also showing a 42% increase. Women's Tetanus Toxoid immunization exceeded its target of 62%.

Linkages between sanitation/access to clean drinking water and improved health outcomes are well established. Prevalent hepatitis is one of the significant manifestations of low-level of sanitation and lacking availability of clean water. Accessibility to clean water including tap, hand pumps or motor pumps increased but not yet reached the target of 90%. It is estimated that 44% of the population has access to safe sanitation and more than 65% has access to clean drinking water. About 55% of the rural population is served with piped water which is mostly from groundwater except in saline lands, where irrigation canals are the main source of domestic water. The National Sanitation Policy aims to reduce by half the proportion of citizens without sustainable access to improved sanitation.

The labor force has grown rapidly because of large cohorts of new entrants coming into the labor market. The informal sector, primarily non-agrarian in nature, accounts for 70% of the employment, mostly composed of the rural male population. The overall labor force participation rate stands at 46% in 2005-2006. Although significant gains in female unemployment are observed, the gender

gap of more than 50% in the labor force participation rate in Pakistan is much higher than the average gap of 35% for South Asia.

Across the development landscape gender inequalities are evident and significant. Aside from the gaps in health, education or employment, in such areas as access to justice, law and order, women greatly lag behind men. Although a series of reform efforts, including the Gender Reform Action Plan and the Jafakash Aurat, provide a comprehensive set of political, institutional, fiscal and economic policy measures, the implementation of these remain plagued by lack of capacity, insufficient budgetary allocations and inadequate accountability and legal frameworks enhanced by ratification of CEDAW framework.

Environmental degradation is fundamentally linked to poverty in Pakistan. A quarter of the poor are directly dependent on natural resources for their livelihoods. According to international estimates, Pakistan is experiencing the second highest rate of deforestation. Air pollution levels in Pakistan's most populated cities are among the highest in the world and likely to climb further causing serious health issues. The environmental challenges are compounded with the present energy crisis faced by Pakistan. Although the bulk of the energy production is hydro power, there is an increasing reliance on thermal power generation using coal with adverse environmental consequences.

Overuse of land for settlement is a cause of environmental degradation in some parts of Pakistan. In that regard, one needs to emphasize especially the regions bordering Afghanistan where there have been millions of refugees since the 1980s. Though their numbers have since diminished, for a few decades the refugees significantly increased the demand for land and other resources in parts of the two provinces. Even though the cultural proximity of the refugees to the local population has eased the co-habitation, and some additional economic dynamism has also been helpful, the presence of a large refugee population did have some adverse effects; particularly, on the environment.

Pakistan has also been affected by recurrent natural disasters which have added to the already significant development challenges facing the nation. Earthquakes, floods, droughts and cyclones have been the major natural disasters in recent years. Pakistan's management of the 2005 earthquake relief efforts is being hailed internationally as a best practice. However, the large earthquake made the authorities aware of the need for a disaster risk management and mitigation capacity, extending to all corners of the country in order that preventive measures be taken in advance, risks be identified and management resources, both human and physical, be readied for quickly helping affected populations.

Agriculture provides the livelihood of two-thirds of the country's population, contributes 22% to GDP, 60% to exports, and employs 45% of the labor force. While much of agriculture's contribution derives from crops and livestock in almost equal proportions, fruits and horticulture are increasing in importance. The most critical challenge confronting the agriculture sector is the growing shortage of water. The Agricultural Strategy for Pakistan therefore prioritizes support for: (i) developing new technologies; (ii) using water more productively; (iii) promoting production and export of high value crops; (iv) accelerating the move towards high-value activities, such as livestock rearing, dairy production, fisheries, and horticulture; (v) creating the necessary infrastructure; and (vi) ensuring availability of agricultural credit.

Industrialization in Pakistan is still in its infancy. Despite quick advances in some areas as mobile telecommunications through foreign direct investment, the depth and breadth of industry is narrow. Integration with global marketing chains is almost non-existent and, consequently, exports of high-value-added products are negligible. Industrial sector is mostly represented by the SMEs which account for 90 percent of all private sector manufacturing units and contribute around 30 percent of GDP. SMEs make a significant contribution (nearly \$3 billion) to exports, and provide over 90 percent of non-agricultural jobs. Lack of access to finance, inefficient technologies, lack of right

skills, weak management and low level of integration with large-scale manufacturing continues to hamper the growth of SMEs.

Improving the Effectiveness of Aid

The total official development assistance (ODA) to Pakistan declined substantially from \$2.03 billion in 1996 to \$786 million in 2000. The first Poverty Reduction Strategy Paper (PRSP) was prepared in 2001. It was a first attempt to consolidate developmental spending and reflect a consolidated framework for pro-poor expenditure. The second generation of PRSP has been in formulation during 2008 and takes into account the Rome Declaration (2003) and Paris Declaration (2005) and offers a medium-term framework for prioritizing development outcomes. It will serve as a foundation in defining key areas for partnership between the Government and its development partners and improve the effectiveness of aid. The PRSP II underscores Government leadership and national ownership of the development process, the need for more demand-driven and innovative approaches to capacity development and the need for greater domestic accountability through a systematic framework of monitoring and evaluating development results.

Earlier, the Pakistan Development Forum, and more recently, the Friends of Democratic Pakistan platform serve as a coordinating platform for the country's bilateral and multilateral development and humanitarian assistance, improving coordination and harmony. This high level policy forum is supported by a number of sectoral donor coordination working groups such as Donor Poverty Reduction Working Group (DPRWG), Inter Agency network on gender and development (INGAD).

United Nations Development Assistance Framework (UNDAF), originally covering the period to 2008, was extended until December 2010 to harmonize with the Medium Term Development Framework. The extension period of 2009-2010 will be the time frame to formulate and implement Joint Programs under the One Program.

The Government's Leadership of the Development Process

Over time, Pakistan has strengthened its systematic coordination of donor programs with its own development process. The Medium Term Development Framework, coupled with the Vision 2030, was prepared through an elaborate network of sector specialist groups from the government, civil society, academia and private sector, supported by Pakistan's international partners, as suitable.

These larger frameworks underpin the formulation of the Government's three-year rolling Poverty Reduction Strategy which prioritizes 17 sectors and stipulates expenditures on social sectors to be 4.5 percent of GDP per year and that allocation for health and education to double as a percentage of GDP over the next 10 years.

Pakistan's poverty strategy takes note of its development challenges and focuses on the following priorities: (1) economic growth and macroeconomic stability; (2) harnessing the potential of people; (3) crafting a competitive advantage; (4) world class infrastructure; (5) financial deepening; (6) effective governance and management; and (7) targeting the poor and the vulnerable.

The PRSP II underlines the following seven principles for implementation of the pro-poor growth strategy:

- a. Gender equality in accessing social services and labor markets. That is a prerequisite to maximize on the contribution of half the nation's human resources and is fundamental to becoming a truly just and fair society.
- b. Increase in domestic investment and savings rates, coupled with higher level of capital formation, is required to balance the vulnerabilities inherent in mobilizing foreign savings as well as to employ the growing labor force productively.

- c. Low trade barriers will facilitate a market-driven approach for responding to changing economic scenarios.
- d. Strong institutions serve as the fundamental platform for implementation of the strategy. Good governance emphasizing accountability, transparency and subsidiarity at all three tiers of the government is critical to meeting the needs of the society, especially the poor.
- e. Special provisioning for the resource poor-regions or those prone to natural disasters to ensure development momentum throughout the country.
- f. Adopt a holistic and integrated approach to implementation for maximizing development gains. For instance, the lift the health of the poor requires efforts not only to minimize the degradation of land and pollution but also to conserve the natural resources, shelter the public commons and associated morbidity as well as mortality rates so as to protect the livelihoods of the poor.
- g. Finally, dedicated and targeted resources in the form of social protection to safeguard the vulnerable section of the population who are unable to participate adequately in the country's economic growth.

Development priorities outlined in the PRSP I and the upcoming PRSP II are factored into the core planning, budgeting and monitoring processes. The instrument for allocation of resources, the Public Sector Development program at the federal level and its provincial equivalents namely the Annual Development Plans and the White Papers are being harmonized with the PRSP II.

The policy-budget link is articulated through the Medium Term Expenditure Framework which is consistent with the Fiscal Responsibility and Debt Limitation Act 2005, whose development goals over the medium term are set with a view to attaining longer-term goals. This is crucial to ensure that short term interventions do not generate dependencies and gains made on the development front are sustained over time. For the country to attain the PRSP targets by 2010, and the MDGs by 2015, ambitious growth targets will be necessary. While efforts to mobilize domestic resources become more dynamic, the Government's planning is heavily influenced by the level of aid flows. The PRSP II aims to partly overcome this shortfall through medium term budgeting of expenditures. However far more effort is required to strengthen the link between federal and provincial planning processes tied into the PRSP to facilitate an inclusive and coherent policy dialogue.

Essentials of the One Program

As a result of the refocusing and revision processes, outcomes of the UNDAF have been streamlined and reduced from 48 to 16. Initial results to be delivered in the piloting timeframe during the period 2008-2010 will be primarily achieved through the implementation of the priority Joint Programs in the five focus areas:

- a. Agriculture, Rural Development and Poverty Reduction
- b. Health & Population,
- c. Education,
- d. Environment,
- e. Disaster Risk Management

The four cross-cutting issues of human rights, gender equality, civil society engagement and refugees are an essential part of the One Program. The Government and the UN Country Team are committed to addressing those issues in a holistic and integrated manner, ensuring that they are treated harmoniously within the Joint Programs.

The five focus areas and the four cross-cutting issues were prioritized for UN support by the UN Country Team together with the Government of Pakistan, in response to the development issues currently on the development agenda. The One Program is in line with the national priorities,

addressing the development gaps through programs and projects and providing a stronger analytical basis for more focused support to the developmental processes in Pakistan. An intensive and in-depth review process (also referred to as the Mid-Term Review) was undertaken in close consultation with relevant national stakeholders including the Government and non-resident UN organizations, civil society organizations, private sector, research institutions, and the donor community. The UNDAF was used as the baseline for that review and five Thematic Working Groups (TWGs) were formed with the participation of relevant UN, government and other development partners. Each TWG covered one of the five thematic areas and has been co-chaired by two Heads of Agency to balance managerial and substantive considerations.

Prioritization and geographic focusing have been essential parts in the strategy and methodology of the One Program formulation to better target limited program resources. It aims to benefit the vulnerable sections of the society and the least developed regions of the country while maximizing efficiency and effectiveness, and systematically measuring progress and impact.

The principal guiding criteria for the One Program implementation include:

- a) **Pro-Poor Focus.** Targeting the groups at the lower end of socio-economic indicator ranks, as well as those prone to specific environmental conditions and disaster risks.
- b) **Federal - Provincial Balance.** Balance the interests and expectations of Federal and Provincial Governments, as well as the emerging needs of the district tier in selecting specific Tehsils or union councils for UN interventions. Furthermore, in the prevailing situation, security considerations will be paramount to ensure staff safety while "delivering as one".
- c) **Build on Past Experience.** Lessons learned from existing and past programs will guide the adoption of rational, harmonized and workable systems suited to Pakistan's conditions for delivery of impact.
- d) **Sustainability:** It will be ensured that future programs/projects developed in line with the UN objectives and in accordance with national priorities of Government of Pakistan will contain inbuilt financial mechanisms for sustainability through pilots to become a showcase for reference/replication.
- e) Any project/program undertaken may have baseline quantifiable indicators before hand for the future evaluation of the project.

It is important to note the direct link between the One Program and the overall UNDAF implementation, which will continue through agency-specific and agency-collaborative work. UN agencies will continue to work towards the delivery of outcomes, identified in the UNDAF through Joint Programs but also through Agency-specific work, the total being the UN's overall contribution towards achieving the MDGs and to the national strategy framework as articulated in the PRSP II. Beyond 2010, the One Program will continue the remaining activities of the Joint Programs, while also seeking new opportunities to increase the impact of JPs already delivered, as well as striving to address the emerging new priorities. The vision is that, over time the One Program will ultimately replace the need for an UNDAF and will directly respond to the priorities pertinent to the development agenda.

Following are features and outcomes of the five Joint Programs that constitute the main pillars of the One Program. Details specific to a particular Joint Program, including programmatic outcomes, outputs, indicators and targets can be found in Annex A.

Joint Program - Agriculture, Rural Development and Poverty Reduction

Background and Context:

With approximately 67% of the country's population and 78% of the country's poor residing in the rural areas and relying directly or indirectly on agriculture, the rural communities form a critical

group for UN support. While agricultural development directly impacts the farm households, it also provides indirect support to non-farm households which account for 57% of the rural poor. Linkages between the agriculture and rural non-farm economy have significant bearing on poverty reduction. Similar to what is observed in many developing countries, the share of agriculture in the economy has steadily shrunk, affecting the incomes of the rural population that has remained large and contributing to a rise in income inequality. This pattern of unequal gains from economic growth is also mirrored in urban areas – particularly, among the poor and middle-income groups. A complex interconnected web of issues impedes the progress towards reducing poverty, acts as a break on improving agricultural productivity and rural development. These include rational use and access to irrigation water; access to clean drinking water; lack of proper sanitation; well targeted welfare programs that benefit the vulnerable; mismatch between policy, budgeting and implementation; weak factor productivity; inadequate management of natural resources; incomplete and defective land records resulting in insecure tenancy rights, land concentration, and poorly regulated water distribution; distorted input market and under-performing micro and small finance markets; inadequate research and extension services; insufficient and unsuitably targeted infrastructure and support services; and above all, governance problems at district, provincial and federal levels.

UN Value Added

In a prioritized manner, the Agriculture, Rural Development and Poverty Reduction Joint Program addresses the identified gaps alluded to above. Issues of productivity, enhancement of unit value, increase of profitability of small holders and value-adding employment will be among the top priorities to improve the living standards of rural communities. In addition, institutional capacity related to WTO/Trade agreements and compliance with other international standards will be addressed. Rural and agricultural communities will be empowered in relation to community-based local development, use of public sector technical support services, piloting demand driven research and enhancing public/private partnerships. In all interventions, special emphasis will be put on assisting the particularly vulnerable and women. Policy support will be given to the Government through facilitating the preparation/fine tuning of poverty strategies, poverty targeting, poverty research and analysis, data collection and review as well as poverty monitoring.

Joint Program Outcomes	Estimated Total Budget: \$260 million
JP Component 1:	Pro-poor sustainable agriculture and rural development
JP Outcome 1.1:	Increased competitiveness of agriculture, industrial and services sectors
JP Outcome 1.2:	Strengthened institutional capacity on WTO/Trade agreements and compliance with other international standards.
JP Outcome 1.3:	Communities empowered for enhanced focus on sustainable Natural Resources Management (NRM).
JP Outcome 1.4	Enhanced food security and diversified livelihoods
JP Component 2:	Decent Employment and Poverty Alleviation
JP Outcome 2.1:	Enabled environment for enhanced income and employment generation opportunities.
JP Outcome 2.2:	Employable skills developed.
JP Outcome 2.3:	Increased opportunities for decent work.
JP Component 3:	Empowerment, Mobilization, and Protection of Poor & Vulnerable Groups

- JP Outcome 3.1:** Enhanced participation in decision making of poor and vulnerable.
JP Outcome 3.2: Enhanced access to social services and social protection/safety nets.
-

JP Component 4: **MDG-Driven Pro-Poor Policy Framework**

- JP Outcome 4.1:** Structures and processes for MDG-based pro-poor policy, planning and research promoted.
JP Outcome 4.2: Rights-based advocacy, awareness and accountability mechanisms strengthened.

Joint Program - Health and Population

Background and Context:

The health system in Pakistan is currently going through reforms at the federal, provincial and district levels – particularly, to improve the access by the poor to health services. For reforms to be successful, it is essential that these are based on clear evidence, are aligned to an overall vision for health development, and make a difference to the health of the population that is in the greatest need of essential health services. The health profile of Pakistan is characterized by a high population growth rate, high infant and child mortality rates, high maternal mortality ratios, and a high burden of communicable diseases. High fertility rate and low CPR are also of concern for a country of limited resources and already with a large population. Communicable diseases account for around half of deaths in Pakistan. It is extremely important for the UN to address this very important area by concentrating on hepatitis, TB, malaria, diarrheal diseases, respiratory diseases and vaccine-preventable diseases. With regard to HIV and AIDS, Pakistan is placed in a concentrated epidemic category with high risk and attention needs to be paid before it grows into a social/health problem harder to control.

UN Value Added

The overall vision of the Joint Program is based on the 'Health for All' approach, through five well-targeted components which will be treated in a holistic manner to ensure linkages and common concerns are well articulated. For example, issues of maternal health are linked to family planning and reproductive health, which are further reinforced by interventions of health promotion and nutrition; communicable disease management and control including HIV and AIDS; Attitudinal changes in a health life style to bring about better health behaviours. Finally, support to the health sector is encapsulated in credible health systems including capacities for human resource development, financing, quality control and effective governance.

Joint Program Outcomes

Estimated Total Budget:
\$225 million

JP Component 1: **MNCH and FP/RH in the context of PHC Framework**

- JP Outcome 1.1:** Public and not for profit services and strategies for integrated Maternal Neonatal and Child Health (MNCH) and Family Planning/ Reproductive Health (FP/RH) services are consistently implemented.
JP Outcome 1.2: Community demand and participation and inter-sectoral linkages for MNCH & FP/RH services are improved
JP Outcome 1.3: Nutrition status especially of infants, young children and child-bearing women is improved

JP Component 2:	Communicable Disease Control
JP Outcome 2.1:	Morbidity and Mortality due to vaccine preventable diseases reduced; Expanded Program on Immunization, Polio Eradication and Measles elimination programs have achieved their targets
JP Outcome 2.2:	TB & other priority endemic disease controlled
JP Outcome 2.3:	National Program for Hepatitis is closer to achieve prevention, control and treatment of the disease in the general population
JP Outcome 2.4:	Malaria Incidence Reduced and an integrated National Program for zoonotic and vector-borne diseases are operational at national, provincial and district level
JP Outcome 2.5:	An integrated communicable disease surveillance and outbreak response system is operational at federal, provincial and district level
JP Component 3:	Nutrition and Health Promotion
JP Outcome 3.1:	Knowledge and practices for health promotion (attitudes, behavior/lifestyle) avoidance of health risks and disease prevention are improved (Nutrition related)
JP Outcome 3.2:	Nutritional status of the population is improved
JP Component 4:	Health System Development
JP Outcome 4.1:	An effective system of human resources development for Health and Population is adopted
JP Outcome 4.2:	An equitable, effective health and population financing system is in place
JP Outcome 4.3:	Policy and management decisions by Federal, Provincial and District government on health and population issues are evidence based using research and improved information system
JP Outcome 4.4:	Effective systems for management of medical technologies are used
JP Outcome 4.5:	Quality assurance and regulation systems in public and private services delivery are used
JP Outcome 4.6:	Governance in health and population systems is significantly improved
JP Outcome 4.7:	Capacity of Health and Population sectors for Gender mainstreaming in programs is improved
JP Component 5:	HIV and AIDS
JP Outcome 5.1:	HIV infection is contained in most at risk and vulnerable populations by contributing 10% towards National Strategic Plan and universal Access Targets for prevention
JP Outcome 5.2:	Multi-sectoral leaders, programs and policies integrate HIV and AIDS related issues encompassing refugees, gender and stigma and discrimination
JP Outcome 5.3:	Increased access to and utilization of quality treatment, care and support for persons affected and infected by HIV

JP Component 6: Population Census

JP Outcome 6.1: Enabled Pakistan Census Organization in adoption of modern technology & approaches to conduct accurate housing and population census

Joint Program - Education

Background and Context:

The Government of Pakistan is constitutionally committed to providing education to all: The State shall "remove illiteracy and provide free and compulsory secondary education within the minimum possible period²." National challenges to realizing that objective were identified in a situation analysis report and they include: weak governance; wide gender gaps in education enrolment; inequalities in provision of education; the "unreached"; need for expansion of non-formal basic education schools/need for alternate schooling systems; limited adult literacy programs and inadequate budget for adult literacy and for scaling up of adult literacy programs; uncertain political commitment; low budgetary allocations, low utilization of funds; lack of proper infrastructure; low quality of education; lack of community ownership/participation; and contradictory data sources and limited coverage by data collection tools.

UN Value Added

The Joint Program will address selected priority concerns and focus on generating impact in the chosen few areas rather than dissipating its limited resources over a broad-based approach to the large number of issues identified above. UN endeavors to contribute towards improvements in access and quality of education in pre-primary education, primary education, middle and higher levels, adult literacy, and technical and vocational education. Emphasis will be placed on the under-served and disadvantaged groups (e.g. poor communities in rural and remote areas, especially girls and women).

Joint Program Outcomes

**Estimated Total Budget:
\$260.8 million**

JP Component 1: Pre- and Elementary Education

JP Outcome 1.1: Sustained policy commitment to education reforms and increased budgetary allocations and expenditures for ECE, (improved/strengthened Katchi), universal and free compulsory education by 2015 and up to class 10 by 2010

JP Outcome 1.2: improved elementary school enrolment, retention and completion especially for girls and vulnerable groups by 2010.

JP Outcome 1.3: Improved learning outcomes for all children who have reached grades 4 and 8 by 2010.

² Article 37-B, Constitution of Pakistan 1973.

JP Outcome 1.4: increased enrolment and retention in ECE (Advanced Katchi) in selected districts by 2010

JP Component 2: Adult Literacy and Non-Formal Basic Education

JP Outcome 2.1: Increased financial allocation for adult literacy and NFE programs by 2010

JP Outcome 2.2: Increased access to the literacy and non-formal education (including home based schools for girls) by 2010

JP Outcome 2.3: Improved learning outcomes of literacy learners by 2010

JP Outcome 2.4: Expanded coverage of NFBE for out-of-school children & youth, working children and industrial workers by 2010

JP Outcome 2.5: Established system of equivalence and certification for adult literacy & NFBE by 2010

JP Component 3: Education System Strengthening

JP Outcome 3.1: Ensured mechanisms for partnerships among all stakeholders and non-state actors for education reform by 2010

JP Outcome 3.2: Improved education governance by 2010

JP Outcome 3.3: Expanded coverage and analysis of learning outcomes for all levels and types of basic education, including adult literacy and NFBE, by 2010

JP Outcome 3.4: Improved system for data collection, analysis, and use for planning and budgeting, policy making at all levels by 2010

JP Outcome 3.5: Increased provision of quality teacher education and training (in-service and pre-service), especially for female teachers by 2010

JP Component 4: Secondary Education with a Focus on TVE & Life Skills

JP Outcome 4.1: Ensuring free and compulsory secondary education and increased enrolment in secondary education by 2010

JP Outcome 4.2: Improved learning outcomes for all secondary students by 2010

JP Outcome 4.3: Increased enrolment in demand-driven TVET with a focus on girls & vulnerable groups by 2010

JP Outcome 4.4: Strengthened institutional capacities of TVET sector by 2010

Joint Program - Environment

Background and Context:

Similar to many developing countries, the development process in Pakistan has been unable to mitigate the effects of increasing demands on the environment and natural resources due to increasing population; intensifying agricultural, municipal and other uses of land; inappropriate technological choices; insufficient awareness and advocacy at policy and other levels; and the fact that the capacity of civil service dealing with environment has remained well below the enormity of the growing challenges. The net result is therefore a continuing decline in the environmental 'standard of living' for the vast majority of Pakistan's population, in both urban and rural communities, but impacting most severely on the poorest of the poor. The fact that environmental degradation has imposed additional costs to the well being of the citizens and to Pakistan's development is not sufficiently recognized. Polluted air, water and land degradation impose

mounting costs on the economy, to which can be added the healthcare costs which rise with levels of contamination, and the human cost of rising mortality in extreme cases of air and water pollution. The effects of global climate change, such as droughts and floods, add to the environmental stress on Pakistan by compounding the food security, shelter and other problems that affect especially the living standards of the poor.

UN Value Added

The Joint Program on Environment focuses on two main areas: sustainable environment management and relieving the stress on the poor due to environmental degradation. Proposed UN interventions will make best use of the synergies created among the participating UN organizations, aligning the specialized inputs of the agencies to generate the highest impact. For example, a project supporting sustainable fuel, water services and resource-based livelihoods for a poor rural community in a managed forested catchment is best organised as an integrated multiple-objective program, and not narrowly as disparate projects on forestry, agriculture, poverty, water and sanitation, health or livelihoods. Support will be provided to the Federal and Provincial authorities to run pilot interventions at selected locations before scaling them up for wider benefit.

Joint Program Outcomes	Estimated Total Budget: \$74.5 million
JP Component 1:	Strengthened and Operational Institutional Mechanisms for Integrated Environmental Management
JP Outcome 1.1:	Institutional mechanisms for integrated environmental management strengthened and operational.
JP Component 2:	Integrated Program on Access to Safe Water and Improved Sanitation
JP Outcome 2.1:	Integrated program towards achievement of MDG Target 7C on access to safe water and improved sanitation
JP Component 3:	Integrated Natural Resource Management in Demonstration Regions
JP Outcome 3.1:	Integrated Natural Resource Management in Demonstration Regions towards the achievement of MDG7A and 7B
JP Component 4:	Sustainable Urbanization
JP Outcome 4.1:	Urban actors having a better understanding of critical urban issues affecting slum dwellers and urban poor in cities including urban issues relating to climate change (as a contribution to achieving MDG7D)
JP Component 5:	Support for Green Industries, Waste Management, Energy and Jobs

JP Outcome 5.1: Support for Green Industries, waste management, Energy and Jobs (to contribute to MDG Targets 7A and 7C)

Joint Program - Disaster Risk Management

Background and Context:

Since the devastating earthquake in 2005, there is a growing realization that Pakistan is exposed to a variety of hazards reflecting the diverse geo-physical and climatic conditions of the country. Pakistan is endowed with mountains in the north; arid and semi-arid plain areas (comprising irrigated/rain-fed agriculture and deserts) and coastal areas in the South. From the situation analysis, four high-disaster risk typologies emerge: earthquake risk, particularly, for selected primary and secondary cities/towns; floods in deltaic and mid-river basins (affecting large areas); cyclones and associated flood risk in coastal areas; and drought in arid and semi-arid areas. In addition, the Northern mountainous regions are threatened by high-frequency but localized-impact events such as landslides, flash floods and avalanches.

UN Value Added

The Joint Program will assist the Government of Pakistan in developing national capacities and systems for disaster risk management (DRM) on a sustainable basis at federal and provincial levels. The Joint Program outcomes aim to minimize losses from natural hazards and enhance coping capacities in high-risk communities. A three-pronged approach will be deployed to reinforce disaster risk management systems and capabilities. Firstly, there will be a strengthening of institutional capacities at federal, provincial and local levels to prioritize DRM in the policy making, planning and development process. Secondly, the Joint program will enhance the understanding and knowledge/information management systems on major hazards, vulnerabilities and associated risks. And, finally, the Joint Program will promote community based DRM, develop guidelines, tools and mechanisms for Community Based DRM and provide feedback to the national policy-making process.

Joint Program Outcomes

**Estimated Total Budget:
\$70 million**

JP Component 1: **Disaster Risk Management**

- JP Outcome 1.1:** Strengthened policies, norms (gender/rights based), institutional and coordination mechanisms (UN, CSO forum) for disaster risk management with particular emphasis upon preparedness and response
- JP Outcome 1.2:** Reliable integrated multi-sectoral knowledge, information and communication system for disaster risk management that reaches out to the grassroots level developed.
- JP Outcome 1.3:** Capacities of key educational and training institutions and professional bodies enhanced for development of human resources for Disaster Risk Reduction and Response
- JP Outcome 1.4:** Communities, vulnerable groups, grassroots organizations and local authorities in high-risk areas empowered with resources and capacities to prepare for, respond to and recover from disasters

Total Estimated Resource Requirements

Each of the UN agencies in the country is committed to allocate not less than 60% of its core resources and 80% of its overall funds to the five Joint Programs. The shortfall between the available resources and the identified resource needs is expected to be filled by the UN's development partners, including government and donors.

In that regard, the UN and the Government of Pakistan bank heavily on the donor community's funding of the Joint Programs as per the political commitments made by the member governments at the various platforms where the Report of the High Level Panel was discussed.

Given that many of the donors that are actively supporting Pakistan's development are funding programs covered under the five Joint Programs, the One Program forms a convenient platform for the Government, UN and the donors to manage their respective development ambitions in a coordinated and synergistic manner. Pooling of resources and management under the One Program is likely to achieve significant savings to all partners – especially, in delivering as one in those regions where the security conditions are particularly challenging yet where the development needs remain more acute than ever.

Agriculture, Rural Development and Poverty Reduction Joint Program	\$260,000,000
Health and Population Joint Program	\$225,000,000
Education Joint Program	\$260,800,000
Environment Joint Program	\$74,5000,00
Disaster Risk Management Joint Program	\$70,000,000
TOTAL	\$890,300,000

Implementation Arrangements

The implementation structure of the One UN Program is a confluence of a number of principles. Paramount is the "delivering as one" by the participating UN organizations, in a strong partnership with the Government of Pakistan, and with clear accountability for the entrusted funds for the One Program, transparently conducting the Joint Programs to generate impact, improving the lives of the targeted vulnerable groups.

The governing bodies created and the reporting lines connecting them reflect the UN Country Team's concern that One Program lives up to its high ambitions. As the nature of piloting implies, there are new approaches being tried and innovative structures set up. These will have to be flexibly adapted to the emerging realities of One Program's implementation and fine-tuned as appropriate. UN Country Team is aware of the responsibility it has to its partners under the One Program in Pakistan, as well as to its wider responsibility to the UN system in general and to the other national and international partners globally. It is expected that the pilot in Pakistan will significantly contribute to the development of improved practices in the UN system to the benefit of more countries.

At the apex of the governing structure is the **High Level Committee**, established in early 2007 that brings together Government, UN and development partners. It oversees all aspects of the reform experience, monitoring of its progress and fine tuning to enhance aid effectiveness. It is chaired by the Prime Minister or his/her representative and consists of the main line agencies at the federal level, provincial governments and selected donor representatives, meeting periodically.

Below the High level Committee are a number of bodies at the One Program, Joint Program and Joint Program Component levels, and the One Fund that serves the whole structure.

At the One Program level, the two important bodies are the **UN Country Team** and the Executive Committee for One Program. The UN Country Team consists of heads of UN agencies, funds and programs represented in Pakistan. It is an inter-agency coordination and decision-making body led by the UN Resident Coordinator. For the One Program, the main purpose of the UNCT is to plan, implement, monitor, fine-tune and ensure the delivery of tangible results in support of national priorities.

Working under the High Level Committee and specifically dealing with the One Program is the "**Executive Committee for One Program**". It will be composed of the Secretary Economic Affairs Division (chair), the Resident Coordinator and one donor representing the donor community. Its principle duties include allocation of unearmarked contributions to JPs based on recommendations and inputs of the UNCT; scrutiny of the allocations of earmarked funds to JPs and JPCs, and endorsement if found suitable; initiating funds transfer to the participating UN organizations; review of submissions to the High Level Committee; and exercise of a high-level overview, and facilitation for implementation of the One UN Program.

At the JP level, there will be three bodies. A **Joint Program Steering Committee** will exist for each of the five JPs. Besides addressing the issues within its substantive coverage, the JPSC will also ensure the integration of the four cross-cutting issues into its JP. It will have two co-chairs: a Government Representative at the level of a Federal Secretary and by a UNCT member.

JP Finance Sub-Committee is a subsidiary body of the JPSC. It consists of the two Co-Chairs of the JPSC and the TWG Co-Chairs (see below). Based on the recommendations of the TWGs, it will take note of donor contributions ear-marked to its JP and make recommendations to the Executive Committee on the allocation of funds to each JP Component. If the Executive Committee endorses the recommended allocation, the decision is communicated through the JPSC to the JPC's Participating UN Organizations. If the Executive Committee does not endorse the recommended allocation, it will provide comments to the JPSC for a review and resubmission.

Thematic Working Groups (TWGs) were established early in the piloting to support the formulation of the five JPs. Each TWG consists of the representatives of the UN entities that participate in the JP and, as needed, will provide substantive guidance during implementation.

Each JP will have a **Convening Agent** to facilitate coordinated program and financial implementation. Its selection will be based on a consideration of the comparative advantages and capacities of the Participating UN Organizations in that JP. A Convening Agent will serve as the secretariat to a JPSC; facilitate overall program and financial implementation; provide inputs to JPSC on the objective application of resource allocation criteria; promote synergies across the thematic area and the cross cutting themes; prepare consolidated standard progress reports at the JP level for submission to the UNCT and the Administrative Agent (see below), while also drawing technical assistance from it.

Joint Programs are formed of several distinct Joint Program Components. Each JPC contains results and resources framework, management arrangements and budget plus monitoring and evaluation mechanisms. At the JPC level, two bodies will provide guidance:

Task Force is responsible for joint implementation and promotion of synergies at the JPC level among the UN and other participants. Each Task Force will be co-chaired by a Government Representative and a UNCT Member. Its membership will consist of one representative of each Participating UN Organization and each participating national partner (including the relevant CSO partner). It will meet very month to facilitate the preparation of the annual work plans and associated budget; make recommendations on resource allocation to participating UN Agencies within the JPC, based on funds made available by the JPSC and submit for approval to the JPSC

Finance Sub-Committee; facilitate overall performance monitoring of the JP Component and make changes if required; oversee the preparation of the standard progress reports and financial progress reports at the JP Component Level for submission to the JPSC.

Based on the complexity of a particular JPC, an ***Inter-Agency Working Group*** may be formed to support the JPC's implementation and to ensure a strong "UN Delivering as One" dimension. It would consist of representatives of the Participating UN Organizations in that JPC.

Also, based on the complexity of a JPC, the partners involved may decide to have a UN ***Convening Agent at the JPC level*** that would facilitate the planning and review of AWPs; promote synergies across the JPC activities and with all cross cutting themes; facilitate overall progress of programmatic and financial implementation of the UN participating entities; provide inputs to the JPC Task Force on the application of the resource allocation criteria; prepares and consolidate standard progress reports at the JPC level while drawing on technical assistance from it.

To support the unfunded portions of the One Program, to facilitate the funding of any new initiatives, to streamline donor resources directed to the One Program and to simplify substantive and financial reporting, the ***Pakistan One Fund*** has been established.

UNCT has designated UNDP as the **Administrative Agent** (AA) that will administer the Pakistan One Fund for the duration of the One Program, which at present is the years 2009 - 2010. UNDP will administer the fund in accordance with the UNDP Regulations and Rules. The Memorandum of Understanding signed on 17 June 2008 by all UN Participating Organizations describes in detail the Pakistan One Fund and the role/responsibilities of the Administrative Agent.

The responsibilities of the Administrative Agent include: receipt, administration and management of contributions from donors; disbursement of funds to the Participating UN Organizations, in accordance with the instructions of the Resident Coordinator, on behalf of the Executive Committee; provide support to the JPSCs and the JPC Task Forces in their reporting functions; and compilation of consolidated narrative and financial reports on Pakistan One Fund to the Executive Committee, UNCT, donors and partners. Participating UN Organizations are responsible for preparing and submitting the reports based on the UN DG standard narrative reports and financial reports to the Administrative Agent in accordance with the reporting schedule specified below, and in the case of narrative reports through their respective JPC Task Forces and JPSCs.

The Administrative Agent will rely on the participating UN agencies and the JPC Task Force, respectively, for:

- Submission of Annual financial statements and reports (as per standard UNCT approved format) for the period up to 31 December of that year with respect to the funds disbursed to it from the Pakistan One Fund, to be provided no later than 30 April of the following year; and Certified final financial statements and final financial reports from the Participating UN Organizations after the completion of the Program and including the final year of the Program, to be provided no later than 30 June of the year following the financial closing of the Program.
- In addition, Participating UN Organizations will report to a JPC Task Force, using standard formats approved by the UNCT. Using those reports, each Joint Program Steering Committee will provide the Administrative Agent with the: JP Annual Narrative Progress Report for that year, no later than 31 March of the following year; and JP Final Narrative Report, no later than 30 April of the year following the financial closing of the JP. The final report will give a summary of results and achievements compared to the goals and objectives of the Joint Program.

The Administrative Agent will prepare consolidated narrative and financial reports, based on the above-mentioned reports, and send them to the Resident Coordinator for onward submission to the UNCT, Executive Committee for One UN Program and to each donor that has contributed to the Pakistan One Fund, in accordance with the timetable established in the Administrative Arrangement.

The Administrative Agent will also provide the following financial statements to the Resident Coordinator for onwards submission to the UNCT, Executive Committee for One UN Program, Donors and Participating UN Organizations: (a)

Certified annual financial statement for the year ("Source and Use of Funds") by 31 May of the following year; and (b) Certified final financial statement ("Source and Use of Funds") to be provided no later 31 July of the year following the financial closing of the Pakistan One Fund.

Monitoring and Evaluation

Implementation of Joint Programs, their components and subsequent projects and activities will be closely monitored by the Joint Program Steering Committees, participating agencies, and the Resident Coordinator's Office. In an interactive process, monitoring will use the established monitoring and evaluation framework that include indicators and means of verification to periodically generate monitoring reports based on information from the field. Collected information will be tabulated and analyzed, and generated results will be shared for feedback with UNCT, participating agencies, implementing partners, donors and the EAD. The ultimate aim is to provide regular feedback to support the adequate, timely, effective, and efficient implementation and delivery of agreed upon outputs. The system developed will track the successes and challenges of the implementation process and will also have the ability to track specifically the progress of the cross cutting issues.

Evaluation of all Joint Programs' outcomes in terms of effectiveness, efficiency and impact will be coordinated by the RC Office. Evaluations will include cross cutting issues and specific tracking of those expected results. These instruments will be essential for logging lessons learnt, identify gaps and successes in approaches and implementation and table suggested measures to improve further programming towards realizing "delivering as one" goal in an effective and efficient manner.

The overall monitoring and evaluation (M&E) framework refers to the outcomes, and their underlying outputs. Measurable (quantitative and qualitative) indicators facilitate the monitoring of progress. The framework also provides suitable targets and baselines for each indicator. In many cases, baseline data for output indicators could not be obtained during the planning phase. It maybe a prerequisite that the baseline indicators are established prior to a project implementation stage. Baselines will be established before the implementation of a project by undergoing rapid baseline surveys in focussed geographical areas. *Dev-Info* is the preferred database software to manage and disseminate information on respective indicators of programmatic outcomes and outputs. The database will be input baseline and target data for respective indicators, and will be regularly (quarterly) updated regarding progress of output indicators at the level of Joint Program. *Resident Coordinator's Office*, with the help of *UN M&E Network*, will support the creation and training of staff in database. At the Joint Program level, the database will be managed and updated through the *Convening Agent* and the necessary feedback will be provided to the government on regular basis.

Progress on all output indicators will be regularly measured through quarterly and annual reviews. The primary responsibility for monitoring rests with the *JPSC* assisted by its *Convening Agent*. *JPC Task Forces* will support *JPSC* in monitoring the progress of outputs and activities and will facilitate overall monitoring of *JPC* implementation. The Task Forces will meet on a quarterly basis to review progress and provide feedback to *JPSC*. Individual *Participating UN Agencies* will be involved in rigorous monitoring of activities in the field during the implementation. They will use their existing M&E expertise or will acquire and strengthen such expertise to meet the challenge. The *Executive Committee* and *UNCT* will exercise high-level overviews of the implementation of the One Program on a yearly basis. As and when required, *TWGs*, *UN M&E network* and *Interagency Working Groups* will extend technical support and facilitation.

Evaluation of Outcomes

Outcomes of a JP will be measured in accordance with measurable M&E framework. The Resident Coordinator's Office, with the help and cooperation of UN M&E Network, will support the process.

Outcome assessment will consist of mid-term and final review of progress on each outcome indicator towards stipulated targets. *JPSC*, facilitated by *Resident Coordinator's Office*, will play a lead role in assessment of outcomes through annual outcome reviews. The *JPSC* may also commission small-scale surveys and case studies on selected subjects to assess results. The *Executive Committee* and *UNCT* may also exercise high-level review of the outcome achievement status. The *Resident Coordinator's Office* will facilitate the overall outcome evaluation process.

In addition to the outcome assessments, the overall JP can be evaluated externally by independent evaluation missions. In line with the *UN Reform Pilot's Evaluability Assessment*, UN DOCO proposes two *External Evaluation Missions* during 2009/10 and 2010/11 to evaluate process results and evaluation of overall impact, respectively.

Progress of programmatic outputs and activities will be assessed and reported against the stipulated targets, baselines and specifications. The progress reports will also reflect upon the processes, challenges and lessons learned. Tabulated reports, graphs and maps will be incorporated into the narrative progress reports.

Under the overall guidance of *JPSC* and *UNCT*, the *Administrative Agent* will work closely with the *RC Office*, *Convening Agents and Participating UN Organizations* in the annual progress reporting exercise. Each Participating UN Organization will report on progress of outputs and activities to the *JPC Task Force*, which will submit the progress reports to the *JPSC* through the *Convening Agent*. Using those reports, each *JPSC* will provide the *Administrative Agent* with Annual Narrative Progress Report. The report will give a summary of results and achievements compared to the stipulated targets of the Joint Program. The *Administrative Agent* will prepare consolidated narrative reports, based on the above-mentioned inputs, and send them to the *Resident Coordinator* for review and onward submission to the *UNCT*, *Executive Committee* and to each donor that has contributed to the Joint Program in accordance with the timetable established in the Administrative Arrangement.

Joint Communications

The UN will develop and implement a harmonized communications plan for the One Program, promoting its advocacy role. Joint communications will present a unified message of the Program around development priorities. The UN Communications Group will take the lead role in this joint effort. UN agencies will also continue to advocate and ensure communication for their own agency and mandate.

Harmonization and Simplification of Operational Practices

Common operational practices apply to a broad range of issues: harmonization of reporting formats, common cost norms, cash transfer modalities, training, contracting and recruitment, project and program management methodologies, and where appropriate back office functions. The UN Country Team has established a Thematic Working group on Harmonization of Business Practices that focuses on simplification and harmonization of human resources, procurement and program management. Aside from those, the UN Operations Management Team has been working on further improving common services in travel, banking, event management, and transport.

The establishment of common management practices is one of the primary success factors to "delivering as one" that requires the joint efforts of the UN at the country and corporate levels, as well as the cooperation of national authorities in order to reduce transaction costs for Government counterparts and key partners, in line with the Paris Declaration.

The UN in Pakistan will work closely with the other One UN pilot countries in the harmonization of management practices. Under the coordination of UN DOCO, each pilot country will pilot the development of harmonized and simplified practices in a selected area, which would then be transported and adapted to other countries. This would avoid the potential of duplication of effort and each country 're-inventing the wheel'.

Thematic Area: Agriculture, Rural Development and Poverty Reduction (ARP)

<i>Summary</i>	<i>Objectively Verifiable Indicator</i>	<i>Means of Verification</i>	<i>Critical Assumptions</i>
JP COMPONENT 1: Pro-Poor Sustainable Agriculture & Rural Development			
UNDAF Outcome 1:			
<input type="checkbox"/> By 2010, contribution of agriculture & rural development to poverty reduction increased.			
Participating UN Agencies: FAO, ILO, UNDP, UNESCO, UNIDO, UNIFEM, WFP			
Participating Line Ministries/Departments: Ministry of Food, Agriculture & Livestock, SIDB (NWFP), SIDB (Punjab), SMEDA/TUSDEC, GoAJK, BIDB (Balochistan), PSIEC Punjab, SMIEC Sindh,, SMEDA, PSIEC Punjab, SSIEC Sindh, SIDB NWFP, SID Baluchistan, Planning and Development, C&W, Labour and Agriculture Departments, MINFAL, TDAP, NAVTEC, Government of Punjab, Government of Sindh, Government of Baluchistan, Government of NWFP, MIN Commerce, Federal/Provincial Chambers of Commerce and Industries, EFP, PWF, PNAC, MIN Industries/SMEDA,			
Joint Programming Outcomes (Intermediate Outcome)			
JP Outcome 1: Increased competitiveness of agriculture, industrial and services sectors	Indicator(s): <ul style="list-style-type: none"> • % increase in yield • % increase in return on investment • % increase in return on labor • Market share in regional and global markets 	Target(s): <ul style="list-style-type: none"> • 20% reduction in yield gap of small holders of 10 commodities • 10% increase in return on investment • 10% increase in labor productivity Baseline: <ul style="list-style-type: none"> • Current yield gap: 30% • Unit value gap: x% 	<ul style="list-style-type: none"> • Agriculture Statistics of Pakistan • State of Pakistan's Competitiveness Report • Sectoral Studies • Agriculture Export Statistics <ul style="list-style-type: none"> • Government support in implementation ensured • Conducive Regulatory framework • Data availability and market information service developed

Summary	Objectively Verifiable Indicator	Means of Verification	Critical Assumptions	
JP COMPONENT 1: Pro-Poor Sustainable Agriculture & Rural Development				
Output 1: Rural infrastructure developed for increased market access.	Indicator(s): <ul style="list-style-type: none"> Physical infrastructure (including on-farm storage facilities, milk collection, centers/rural assembly markets) # of infrastructure development initiatives undertaken in Refugee³ Affected and Hosting Areas (RAHA) in NWFP and Baluchistan 	Target(s): <ul style="list-style-type: none"> 50 common facility centers established 200 community⁴ based milk collection centers 20 chilling units 30 veterinary diagnostic laboratories and veterinary hospitals strengthened 20 model rural markets established (10 each for agriculture and livestock respectively) 10 value chains analysis (agriculture/livestock and dairy) 200 entrepreneurs including women linked to end markets At least 10% of above interventions focus RAHAs 	<ul style="list-style-type: none"> Progress Reports, Internal and External Review 	<ul style="list-style-type: none"> Availability of resources

³ **Refugee(s):** (1) Somebody seeking safe place: somebody who seeks or takes refuge in a foreign country, especially to avoid war or persecution (often used before a noun); (2) *UNHCR Convention on Refugees, 1951* – a person who is outside his or her country of nationality or habitual residence; has a well-founded fear of persecution because of his or her race, religion, nationality or membership of a particular social group or political opinion; is unable or unwilling to avail himself or herself of the protection of that country, or to return there for fear of prosecution

⁴ **Community:** (1) People in area: a group of people who live in the same area, or the area in which they live, e.g. a close knit fishing community; (2) People with common background: a group of people with a common background or with shared interests within society, e.g. a financial community; (3) Society: the public or society in general, e.g. a useful member of the community

Summary	Objectively Verifiable Indicator	Means of Verification	Critical Assumptions	
JP COMPONENT 1: Pro-Poor Sustainable Agriculture & Rural Development				
Output 2: Communities enabled to adopt more efficient practices in agriculture, industrial and services sectors.	Indicator(s): <ul style="list-style-type: none"> • # of Producer Field Schools (PFS) on Integrated Crop Management/GAP and GMP • # of CBO's to promote rural SMEs 	Target(s): <ul style="list-style-type: none"> • 500 PFS established for ICM at least 75 FBS are based in RAHA training/GAP/GMP (10,000 producers trained) • 2000 livestock producers trained in feed supplementation and livestock management • 500 Farmers trained in high efficiency irrigation and crop management • 500 small holder high efficiency irrigation unit distributed • X no CBO's formed to promote rural SMEs 	<ul style="list-style-type: none"> • Progress Reports 	<ul style="list-style-type: none"> • Stakeholders' involvement and availability of resources
Output 3: Institutional capacity strengthened for effective service delivery.	Indicator(s): <ul style="list-style-type: none"> • # of Agriculture and Livestock Extension Workers /staff of Industrial department Trained by sex and location in Integrated Crop Management/GAP/GMP • Revised Agriculture Curricula by Training Institutions • # of Community Groups mobilized and utilized 	Target(s): <ul style="list-style-type: none"> • 500 extension workers /staff of industrial department trained in ICM (TOF/FF) Methodologies, GAP, GMP. • 5 Agriculture training institutions have revised curricula promoting the concept of right based approach and is responsive to vulnerability issues inter alia; displacements • 20 livestock extension services centers including 5 in RAHA strengthened. • 20 community 	<ul style="list-style-type: none"> • Progress Reports • Review and Evaluation Reports 	<ul style="list-style-type: none"> • Government readiness to mainstream ICM methodologies, Institutional involvement

Annex C List of UN Country Team Members

		Agency	Designation	Accreditation	Officially represented in the country by:
	UN RC	United Nations	Chair, UN Resident Coordinator	Accredited	
1	FAO	Food and Agricultural Organization	Representative	Accredited	
2	IFAD	International Fund for Agricultural Development	Resident Liaison Rep.	-	RC
3	ILO	International Labour Organization	Country Director	Accredited	
4	UNAIDS	Joint UN Program on HIV/AIDS	Country Coordinator	-	RC
5	UNDP	UN Development Program	Country Director	-	RR (UNDP)
6	UNESCO	UN Educational, Scientific & Cultural Organization	Representative	Accredited	
7	UNFPA	UN Population Fund	Representative	Accredited	
8	UN-HABITAT	UN Human Settlement Program	Country Prog. Manager	-	RC
9	UNHCR	UN High Commissioner for Refugees	Representative	Accredited	
10	UNICEF	UN Children's Fund	Representative	Accredited	
11	UNIDO	UN Industrial Development Organization	Representative	Accredited	
12	UNIFEM	UN Development Fund for Women	Country Prog. Director	-	RC
13	UNODC	UN Office on Drugs and Crime	Representative	Accredited	
14	WFP	World Food Program	Representative	Accredited	
15	WHO	World Health Organization	Representative	Accredited	
16	IOM	International Organization for Migration	Regional Representative	Accredited	
Permanent Observers					
1	UNDSS	UN Department for Safety and Security	Chief Security Advisor	-	RC
2	UNV	UN Volunteers	Program Officer	-	RR (UNDP)
3	UNOPS	UN Office for Project Services	Country Coordinator	-	RR (UNDP)
4	UNIC	UN Information Centre	-	-	

Representatives of other UN entities operational but non-resident in Pakistan are invited to participate as observers. They include:

UNOHCHR	UN Office of High Commissioner for Human Rights
IAEA	International Atomic Energy Agency
UNCTAD	United Nations Conference on Trade and Development
UNEP	United Nations Environment Program
UNESCAP	United Nations Economic & Social Commission for Asia/Pacific

Annex D: Governance Structure of One UN Pakistan

Pakistan is one of the eight countries in which the UN Country Teams are piloting “delivering as one” initiatives. An important component of that UN Reform effort is the “One Program” that comprises the Joint Programs and Joint Program Components through which the Participating UN Organizations will contribute to Pakistan’s socio-economic development.

The following is a succinct description of the governance structure formulated through broad discussions within the UN Country Team, as well as those with national and international stakeholders. UNCT is likely to review this governance arrangement to bring it in compliance with changes due to such factors as the possibility of new UN entities establishing representation in Pakistan, the experimental nature of piloting, the evolving national priorities and the extent of resource mobilization against the resource gaps.

At the overall UN Reform Pilot level, the highest governance body is the **High Level Committee on UN Reform in Pakistan**, established in early 2007. It is the supreme body that brings together Government, UN and development partners. The High Level Committee oversees all aspects of the reform experience in Pakistan, monitoring of its progress, and fine tuning to enhance aid effectiveness. It is chaired by the Prime Minister or his/her representative and consists of main line agencies at the federal level, provincial governments and selected donor representatives, meeting periodically. The High Level Committee determines the programmatic areas of the One Program Document.

This document focuses on the One Program and summarizes the management arrangements at three inter-related levels:

- 1) One Program;
- 2) Joint Programs; and
- 3) Joint Program Components

as well as the common instrument for all three, the Pakistan One Fund.

1. One Program

The **One Program** in Pakistan consists of a set of UN joint programmatic interventions planned for the period 2008 to 2010, the initial period of “delivering as one” in Pakistan. During that period, it is expected that about 80% of the resources available with the UN family will be devoted to joint programs.

The One Program plus the stand-alone interventions of individual UN agencies form the revised UNDAF (United Nations Development Assistance Framework), which is the result of a detailed process of review of the current development context, MDG prioritization, stakeholder analysis and SWOT analysis.

The One Program Document provides details on the joint programs, the results and resources framework, management arrangements, overall budget and monitoring and evaluation mechanisms.

At the One Program level, there will be two decision-making/advisory bodies:

- Within the UN system in Pakistan, the **United Nations Country Team (UNCT)** consisting of the heads of all agencies, funds and programs represented in Pakistan is the inter-agency coordination and decision-making body, led by the Resident Coordinator. Within One Program context, the main purpose of UNCT is to plan, implement, monitor, fine tune and ensure the delivery of tangible results in support of the development agenda of Pakistan.
- Under the High Level LC, as its subsidiary body, there will be an **Executive Committee for One Program**, which will normally meet quarterly, to focus on the One Program. Representing the broad constituency of the High Level Committee, the Executive Committee will consist of the Secretary of the Economic Affairs Division (EAD) as Chair, the Resident Coordinator and one donor representing the donor community. Its principal duties are as follows:
 - a) Regarding the *un-earmarked contributions* at the One Program level, it decides on their allocation to one or more Joint Programs in consultation with Line Ministries, national partners, donors and the UNCT..
 - b) In addition, it endorses *allocations to the various Joint Program Components* within a Joint Program, based on recommendations and inputs of the respective Joint Program Steering Committee.
 - c) It initiates the *transfer of funds* to Participating UN Organizations through the Resident Coordinator and the Administrative Agent, based on the recommendations of the JPC Task Forces.
 - d) It receives, and forwards to the High Level Committee, with appropriate comments, *compilation of consolidated narrative and financial reports* as well as the *certified financial statements*.
 - e) It exercises high-level overview of the implementation of the One Program, providing guidance and facilitation, as appropriate.

2. Joint Programs (JPs)

As constituent elements of the One Program, five Joint Programs are being developed (Agriculture, Rural Development and Poverty; Health and Population; Education; Environment; and Disaster Risk Management). The Joint Program Documents provide details on the various joint program components, the results and resources framework, management arrangements, JP budget, and monitoring and evaluation mechanisms. The JP Documents are expected to be finalized by end-November 2008.

At Joint Program level, there will also be three bodies that offer guidance:

- A **Joint Program Steering Committee (JPSC)** will provide strategic guidance for implementation of the Joint Program. Each JP, aside from fully addressing the issues within its substantive coverage, also integrates four cross-cutting issues (refugees, human rights, civil society engagement and gender). A Joint Program Steering Committee will be co-chaired by a Government representative at the level of Federal Secretary (or equivalent) and by a UNCT member (representing the UNCT). The co-Chairmanship in a Joint Program Steering Committee will not imply any charges to the JP budget. A JPSC includes one representative from each participating UN organization and one representative from each participating national partner. In addition, observers by invitation could include up to two representatives of donors, civil society and other partners as suitable. The JPSCs will normally meet every two months and, *inter alia*, will
 - a) review and recommend for approval JP documents prepared by the TWGs;
 - b) approve prioritisation of outcomes/outputs, work plans and prioritised resource allocation as required at the JP and Joint Program Component (JPC) levels;
 - c) oversee advancement of implementation of JPs and make changes if required at the JP levels; and
 - d) review and approve financial progress and standard progress reports at the JP level.
- A JPSC, through its subsidiary **JP Finance Sub-Committee**, (consisting of the two Co-Chairs of the JPSC and the TWG Co-Chairs) and based on recommendations of the relevant Thematic Working Group, will take note of donor contributions earmarked to its Joint Program and make recommendations to the Executive Committee on the allocation of funds to each Joint Program Component.
 - a) If the Executive Committee endorses the recommended allocation, JPSC communicates this to the Participating Organizations in that JPC.

- b) If the Executive Committee does not endorse the recommended allocation, it will ask the JPSC to review its recommendation, based on its comments, and re-submit.
- **Thematic Working Groups (TWGs)** were formed early in the piloting process to coordinate the formulation of the JPs. TWGs consist of representatives of the UN entities that participate in the JP, and will remain ready to provide substantive guidance to concerned JPs, ensuring that “delivering as one” happens.

Each JP will have a **UN Convening Agent** to facilitate coordinated program and financial implementation. Its selection will be based on a comparative advantage and capacity assessment of the interested agencies. A Convening Agent

- a) acts as the secretariat for the JPSC;
- b) facilitates overall program and financial implementation;
- c) provides inputs to JPSC on the objective application of resource allocation criteria;
- d) promotes synergies across the thematic area and the cross-cutting themes;
- e) prepares and consolidates standard progress reports at the JP level for submission to the UNCT and the AA, while drawing technical assistance from the AA.

3. Joint Program Components (JPCs)

Joint Programs are formed of several distinct **Joint Program Components (JPCs)**. Each JPC is articulated in a document containing the results and resources framework, management arrangements, and budget plus monitoring and evaluation mechanisms.

At JPC level, there will be two bodies for guidance:

- Each JPC will be managed by a **Task Force** which is responsible for joint implementation and promotion of synergies at the JPC level among UN and other participants. Each Task Force will be co-chaired by a Government representative and a UNCT member. Its membership will consist of one representative of each Participating UN Organization and participating national partner (including relevant CSO implementing partners). A Task Force will normally meet every month

- a) to facilitate the *preparation of annual work plans and associated budgets* at the JP Component level as submitted by the Participating Agencies and ensure conformity with the JP document;
 - b) make recommendations on resource allocation to Participating UN Organizations within the JPC, based on the funds made available to the JPC by the JPSC, and submit them for approval to the JPSC Finance Sub-Committee.
 - c) facilitate overall performance and monitoring of JP Component implementation and make changes if required;
 - d) oversee the *preparation of standard progress reports and financial progress reports* for submission to the JPSC and review and approve financial progress reports and standard progress reports at the JP Component levels for submission to the JPSC; and
- Based on the complexity of a particular JPC, it might be desirable to constitute an **Inter-Agency Working Group** to support the JPC implementation and ensure a strong “UN delivering as one” dimension. It would consist of representatives of the Participating UN Organizations in that JPC.

Based on the complexity of a JPC, the partners involved in that JPC may decide to have a **UN Convening Agent**. It

- a) facilitates the planning and review of annual work plans;
- b) promotes synergies across the JPC activities and with all cross cutting themes;
- c) facilitates overall progress of programmatic and financial implementation of the UN participating entities;
- d) provides inputs to the JPC Task Force on the application of the resource allocation criteria; and
- e) prepares and consolidates standard progress reports at the JPC level for submission to the JPSC, drawing on technical assistance from the AA.

4. Pakistan One Fund

The Pakistan One Fund will facilitate and streamline the donor resources directed to the One Program, as well as to simplify substantive and financial reporting. As such, the Pakistan One Fund is a major vehicle for resources mobilization from donors to support the unfunded portions of the One Program and to facilitate the funding of any new initiatives within the context of the One Program.

UNCT has designated UNDP as the **Administrative Agent (AA)** that will administer the Pakistan One Fund for the duration of the One Program, which at present is for the period 2008 - 2010. UNDP will administer the fund in accordance with the UNDP Regulations and Rules. The Memorandum of Understanding signed on 17 June 2008 by all UN Participating Organizations describes in detail the Pakistan One Fund and the role/responsibilities of the Administrative Agent.

The responsibilities of the Administrative Agent include:

- a) *Receipt, administration and management of contributions* from Donors;
- b) *Disbursement of funds to the Participating UN Organisations*, in accordance with the instructions of the Resident Coordinator, on behalf of the HLC Finance Sub-Committee.
- c) Provide support to the JPSCs and the JPC Task Forces in their reporting functions, as mutually agreed by the respective parties; and
- d) *Compilation of consolidated narrative and financial reports* on Pakistan One Fund to the Executive Committee, UNCT, donors and partners. Participating UN Organizations are responsible for preparing and submitting the reports based on the UNDG standard narrative reports and financial reports to the Administrative Agent in accordance with the reporting schedule specified below, and in the case of narrative reports through their respective JPC Task Forces and JPSCs. In this, the Convening Agents at the JP and JPC levels will support the Participating UN Organizations, which will report on the specific JP/JPC activities they are responsible for and the related funds they have received.

In terms of reporting, the Administrative Agent will work closely with the RC Office, Convening Agents and Participating UN Organizations as follows:

- Through the Convening Agent, each Participating UN Organization will provide the Administrative Agent with the following financial statements and reports at the One Program, JP or JPC level, as applicable, using the standard formats approved by the UNCT:
 - (b) *Annual financial statements and reports* for the period up to 31 December of that year with respect to the funds disbursed to it from the Pakistan One Fund, to be provided no later than 30 April of the following year; and
 - (c) *Certified final financial statements and final financial reports* from the Participating UN Organizations after the completion of the Program and

including the final year of the Program, to be provided no later than 30 June of the year following the financial closing of the Program.

- In addition and again through the Convening Agents, Participating UN Organizations will report to the JPC Task Force, using standard formats approved by the UNCT. Using those reports, each Joint Program Steering Committee (through the JP Convening Agent, as applicable) will provide the Administrative Agent with the following:
 - (a) JP Annual Narrative Progress Report for that year, no later than 31 March of the following year; and
 - (b) JP Final Narrative Report, no later than 30 April of the year following the financial closing of the JP. The final report will give a summary of results and achievements compared to the goals and objectives of the Joint Program.

The Administrative Agent will prepare *consolidated narrative and financial reports*, based on the above-mentioned reports, and send them to the Resident Coordinator for onward submission to the UNCT, Executive Committee for One Program and to each donor that has contributed to the Pakistan One Fund, in accordance with the timetable established in the Administrative Arrangement.

The Administrative Agent will also provide the following *financial statements* to the Resident Coordinator for onwards submission to the UNCT, Executive Committee for One Program, Donors and Participating UN Organizations:

- (a) *Certified annual financial statement* for the year ("Source and Use of Funds") by 31 May of the following year; and
- (b) *Certified final financial statement* ("Source and Use of Funds") to be provided no later 31 July of the year following the financial closing of the Pakistan One Fund.
